9T0MD Democratic Rep of Congo -update by Emil DL8JJ

We are looking for a CW operator for our upcoming DXpedition to the Democratic Republic of Congo from September 30th to October 13th, 2026. I have been traveling with MDXC for years and the team is amazing. If you are interested, please contact me or Antonio Cannataro – I8KHC.

VP0SG South Georgia Island -update

Second Young Operator Announced – Strong Focus on the Next Generation.

Amateur Radio DXpeditions (ARD) is pleased to announce that Leon Hellmich, DL3ON, will join the VP0SG South Georgia 2027 DXpedition as our second young operator, following the earlier announcement of Violetta, KN2P.

Leon, aged 22, is currently studying electrical engineering at the Technical University of Munich. He discovered amateur radio in 2020 and quickly became active in contesting. Operating from DQ2A (former DQ2C), he developed strong contesting and CW skills, which led to invitations to participate in major multi-operator efforts. His experience includes operations from ES9C (Estonia) during CQ WW SSB 2022, as well as subsequent contests from PJ2T and J62K. He also operated as I44P at WRTC 2022 in Italy, where he was the youngest participant. More recently, Leon was part of the S21WD DXpedition to Bangladesh in March 2026. In addition to his on-air activity, Leon is actively involved in the Youngsters On The Air (YOTA) program, contributing to the organization and documentation of youth camps across Europe. Alongside his studies, he serves as a student representative and is actively involved in running his university radio club station.

RI1FJL Franz Josef Land -update by Vasily R7AL

I recently received a written response from the Northern Administration of Hydrometeorology and Environmental Monitoring agreeing to accommodate expedition participants at the [E.T. Krenkel meteorological station on Heiss Island](#). This is a major milestone in expedition preparations!

Accommodation will be provided on a commercial basis.

There's also a change in the team. Alexander, R2DVE had to withdraw from the expedition. His place has been taken by Ruslan, UA4Z whom is one of Russia's leading contesters and will undoubtedly strengthen the team.

A huge thank you to everyone who has already supported the expedition with their donations!

3G0Z and XR0Z Juan Fernandez -update by Felipe XQ7IR

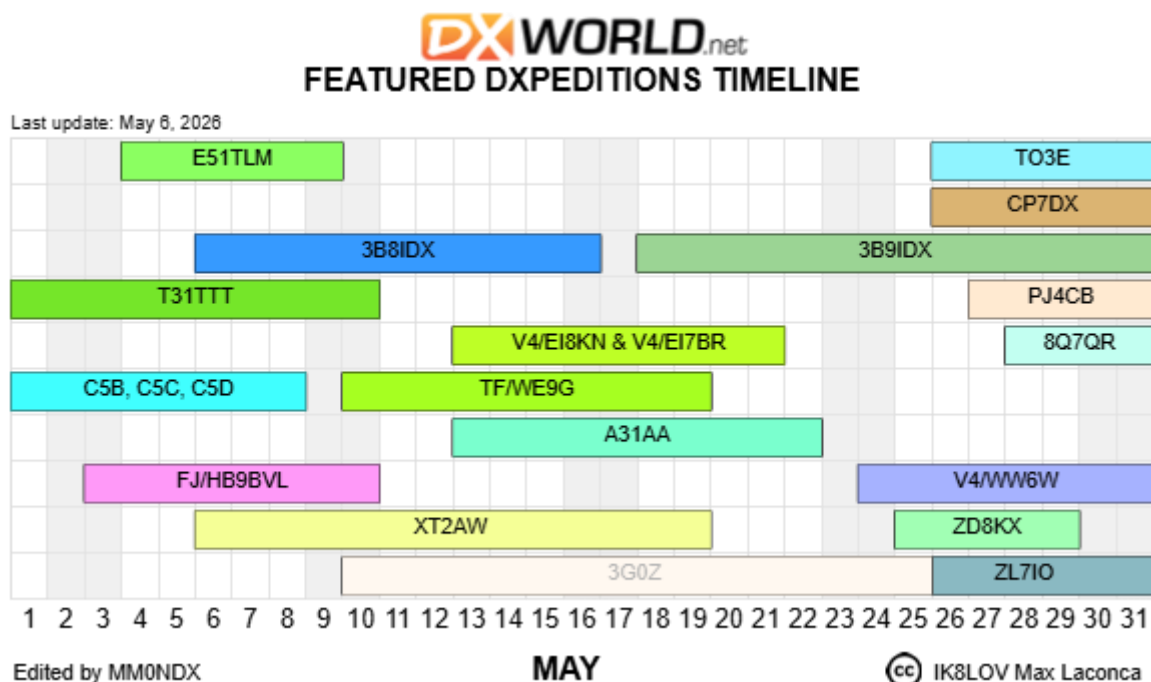

There is now a very strong possibility of carrying out a short but highly valuable operation from Alejandro Selkirk Island SA-101 (7.4% according IOTA Ltd), with an estimated on-air window of approximately 24 to 36 hours.

This activation will depend entirely on the final logistics costs involved in moving part of my radio equipment to the island, as well as securing enough gasoline to keep the generator running during the operation. Should this operation take place, will be under the callsign **XR0Z**, which has already been requested and officially authorized by SUBTEL.

Although this would be a limited-time activity, it represents an excellent and perhaps rare opportunity to put SA-101 on the air again for the benefit of the worldwide IOTA community.

At this moment, everything is under evaluation and the project remains open, but the chances are real and increasing. More information soon as plans develop.

Hamvention DX Forum 2026

Dayton Hamvention[®]

The DX Forum at the 2026 Dayton Hamvention promises a compelling and thought-provoking lineup for amateur radio operators with a passion for DXing. Moderated by Brian Bathe, AD8FD, and sponsored by the SouthWest Ohio DX Association, the forum will showcase world-class DXpeditions, innovative operating techniques, and hard-earned lessons from challenging environments.

This year's DX Forum features three in-depth presentations that span the extremes of modern DXing, from the most remote islands on Earth to fully remote, solar-powered operations and real-world lessons learned when conditions do not go as planned.

3Y0K Bouvet Island: The Second Time Around. Presented by Dennis Ward, KT8X, and Bob Ronk, W9AP

Returning to Bouvet Island after the limited 3Y0J activation, the 3Y0K team set out to deliver the level of operation the DX community had hoped for. This presentation offers a behind-the-scenes look at the immense planning, logistics, weather challenges, and equipment hurdles involved in mounting a second activation of one of the rarest and most difficult DXCC entities.

Desecheo 2026 DXpedition: The First All Solar Powered Unattended DXpedition in History. Presented by Otis Vicens, NP4G, and Ez Prado, HI3R.

This groundbreaking presentation details the KP5 Desecheo operation, which brought the island back on the air using a fully remote, solar-powered platform. Operating unattended for more than 40 days and logging over 100,000 QSOs, the team relied on advanced power management, propagation planning, and multistream FT8 to maximize results while conserving energy. Attendees will gain insight into the technical, logistical, and personal challenges of running a world-class DXpedition remotely.

Failures and Lessons Learned from DXing in Adverse Conditions. Presented by Paul Ewing, N6PSE.

Not every DXpedition follows the plan. Paul Ewing shares candid stories of operations impacted by weather, equipment failures, logistics breakdowns, and human factors. This session focuses on what went wrong, what was learned, and how those experiences can help future DXpeditions better prepare for the unexpected.
